# The developing brain in health and disease

Tuesday 19 March - Wednesday 20 March 2019

Lady Margaret Hall, University of Oxford, OX2 6QA

The Academy of Medical Sciences is convening a two day scientific meeting to explore key areas of neurodevelopmental research in a unique forum that emphasises discussion and collaboration between disciplines, career stages and sectors. The meeting's talks and discussions will span a broad range of neurodevelopmental and disorder research, from *in utero* to adolescence, from multiple perspectives, including molecular, cellular, circuit/systems and behavioural levels. We welcome researchers from all backgrounds interested in brain development and strongly encourage early career researchers, from PhD level onwards, to register for this meeting. Registration is free.
