

Post-Doctoral Research Associate

Position available at the Sancho Lab
Centre for Gene Therapy & Regenerative Medicine (CGTRM)
King's College London

Located in the Centre for Gene Therapy & Regenerative Medicine (CGTRM) at King's College London, the Sancho Lab focuses in studying the fundamental regulatory networks involved in pancreatic cell fate decisions using adult derived organoids and induced pluripotent stem cells (iPSCs), and to apply this knowledge to new strategies in regenerative medicine for diabetes.

The post-doctoral researcher will join an enthusiastic, collaborative, hardworking and dynamic team and will work on a very exciting MRC funded project.
